

Evgeny Bazarov

Founding AI Engineer | AI Engineering Leader

Paris, France (CET) | +33 6 37 24 58 26

bazarov.me | linkedin.com/in/evgeny-bazarov | github.com/EBazarov

Founding AI Engineer and hands-on technical leader with 10+ years shipping reliable AI agents, retrieval and document-intelligence products. Led teams of 3-8 engineers across accounting, Legal Tech and Trust & Safety.

Experience

Allia - Founding AI Engineer · Dec 2025 - Present

AI platform for accounting firms

- Designed and productionized a multi-agent accounting copilot with LangChain, LangGraph, hybrid RAG and domain tools alongside the CTO and Product team.
- Built an evaluation harness with Langfuse tracing that cut quality regressions by 68% and critical failures by 89%, while reducing latency by 32% and cost by 9% in a selected configuration.
- Scaled ingestion to 340,000 workflows per week with Temporal workers, bounded concurrency and batched vector writes.

Skills: LangChain, LangGraph, MCP, Langfuse, Temporal, PostgreSQL, pgvector, OpenSearch, turbopuffer, AWS, Sentry

Gino Legal Tech - Lead AI Engineer/Principal AI Engineer · Jan 2025 - Dec 2025

Contract intelligence and Legal Tech

- Led the AI team and production roadmap with the CEO, Product and Legal teams.
- Built extraction, clause review, Word redlining and amendment workflows, cutting legal processing time by 48%.
- Designed auditable graph-vector retrieval with evaluations, tracing and guardrails.

Skills: Python, LLMs, hybrid retrieval, GraphRAG, Neo4j, Word redlining, Langfuse, FastAPI

Tomorro - Lead AI Engineer · Jul 2024 - Jan 2025

Contract lifecycle management

- Led 3 AI engineers to productionize a multi-agent contract assistant, raising user satisfaction from 75% to 92%.
- Advanced retrieval and GraphRAG for contract repositories.

Skills: AI agents, RAG, GraphRAG, LangChain, PostgreSQL, pgvector, GCP

Besedo - Head of Data Science · Jun 2017 - Jun 2024

Trust & Safety technology

- Progressed from Senior Data Scientist to Head of Data Science, leading up to 8 engineers and 130+ models processing tens of millions of items per day.
- Industrialized ML/MLOps to reduce delivery cycles from months to weeks across multilingual NLP, computer vision and similarity search.

Skills: Python, PyTorch, NLP, computer vision, similarity search, MLOps, Docker, Kubernetes, AWS, GCP

ioSquare - Data Scientist / Data Science Intern · Jun 2015 - Jun 2017

Multilingual NLP startup

- Built multilingual NLP moderation and fraud-prevention systems, embeddings and data-exploration tooling from proof of concept to deployment.

Skills: Python, NLP, embeddings, scikit-learn, data visualization

Skills

AI engineering: Large Language Models (LLMs), AI agents, agent harnesses, context engineering, RAG, GraphRAG, document intelligence, agent evaluation

Leadership & delivery: architecture, roadmaps, hiring, mentoring, OKRs, executive communication, GDPR, EU AI Act

Education

EISTI, now CY Tech - Master's, Data Science, Big Data and Business Analytics · 2014 - 2016

Bauman Moscow State Technical University - Engineering degree, Radio-electronic Systems and Devices · 2008 - 2014
